Abstract

Priority: 1

Type: long article

Target journal(s): Composites Part B: Engineering, Composites Part A: Applied Science and Manufacturing, Composite Science and Technology, Composite Structures, Journal of Composite Materials, Composite Communications

1. Introduction

2. RVE models & FE discretization

- 2.1. Models of Representative Volume Element(RVE)
- 2.2. Finite Element (FE) discretization

3. Results & Discussion

- 3.1. Effect of 0° ply thickness on the interaction between debonds in a 90° ply with a single layer of fibers
- 3.2. Effect of 0° ply thickness on the interaction between layers of fully bonded fibers and a centrally located line of debonded fibers in a 90° ply
- 3.3. Effect of 0° ply thickness on the interaction of debonds in a 90° ply with multiple layers of fibers

 ${\it subsection Comparison with the single fiber model with equivalent boundary conditions}$

4. Conclusions & Outlook
