12th International Conference on Composite Science and Technology (ICCST/12) Sorrento (IT), May 8-10, 2019

Outline

- Initiation of Transverse Cracks in FRPCs
- Modeling the Fiber-Matrix Interface Crack
- Debond Energy Release Rate
- Conclusions

Initiation of Transverse Cracks in FRPCs

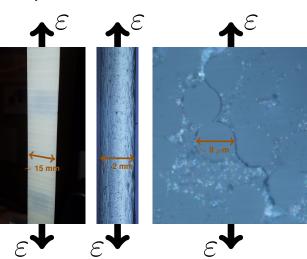

Microscopic Observations

Left:

front view of $[0, 90_2]_S$, visual inspection.

Center:

edge view of $[0, 90]_S$, optical microscope.

Right:

edge view of $[0, 90]_S$, optical microscope.

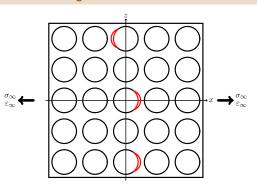

Micromechanics of Initiation

Stage 1: isolated debonds

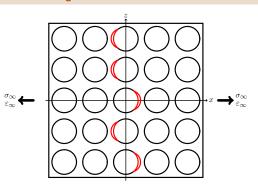

Micromechanics of Initiation

Stage 2: consecutive debonds

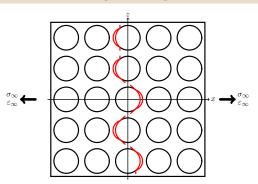

Micromechanics of Initiation

Stage 3: kinking

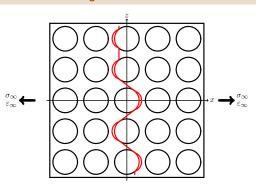

Micromechanics of Initiation

Stage 4: coalescence

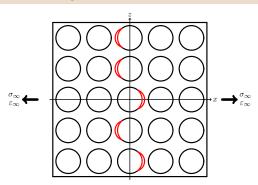

Objective of the Study

Stage 2: consecutive debonds

- → Effect of debond-fiber interaction?
- → Effect of debond-debond interaction?
- ➤ Effect of relative debond position on consecutive fibers: same or opposite sides?

MODELING THE FIBER-MATRIX INTERFACE CRACK

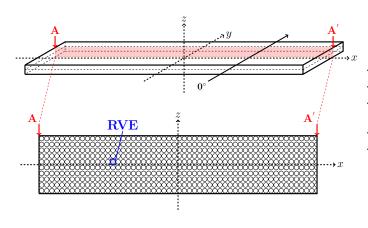

Geometry

- L, W >> t
- \rightarrow $L, W \rightarrow \infty$
 - Square packing
- \rightarrow $L_d >> \Delta \theta_d$
- → 2D RVE

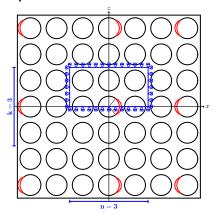

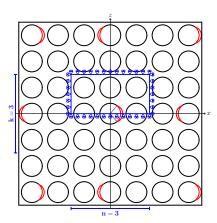

Representative Volume Elements

$$n \times k$$
 – coupling

 $n \times k$ – asymm

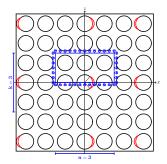

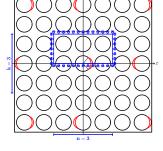

Equivalent Boundary Conditions

Symmetric Coupling

$$u_z(x,h)=u_z^{\nu}$$

Anti-symmetric Coupling

$$u_z(x,h) - u_z(0,h) = -(u_z(-x,h) - u_z(0,h))$$

 $u_x(x,h) = -u_x(-x,h)$

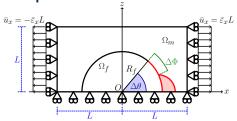

Assumptions

$$R_f = 1 \ [\mu m] \quad L = rac{R_f}{2} \sqrt{rac{\pi}{V_f}}$$

Material	Е	ν
glass fiber	70.0	0.2
ероху	3.5	0.4

- → Linear elastic, homogeneous and isotropic materials
- → Plane strain
- Frictionless contact interaction
- → Symmetric w.r.t. x-axis
- → Coupling of x-displacements on left and right side (repeating unit cell)
- Applied uniaxial tensile strain $\bar{\varepsilon}_x = 1\%$

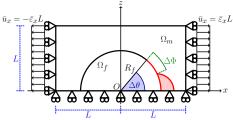

ransverse Cracks in FRPCs Modeling the Fiber-Matrix Interface Crack Debond Energy Release Rate Solution

Solution

$$\begin{split} &\inf \Omega_f, \Omega_m: \\ &\frac{\partial^2 \varepsilon_{xx}}{\partial z^2} + \frac{\partial^2 \varepsilon_{zz}}{\partial x^2} = \frac{\partial^2 \gamma_{zx}}{\partial x \partial z} & \text{for } 0^\circ \leq \alpha \leq \Delta \theta: \\ &\varepsilon_f = \gamma_{xy} = \gamma_{yz} = 0 & \text{for } \Delta \theta \leq \alpha \leq 180^\circ: \\ &\frac{\partial \sigma_{xx}}{\partial x} + \frac{\partial \tau_{zx}}{\partial z} = 0 & \overrightarrow{u}_m(R_f, \alpha) - \overrightarrow{u}_f(R_f, \alpha) = 0 \\ &\frac{\partial \sigma_{zx}}{\partial x} + \frac{\partial \sigma_{zz}}{\partial z} = 0 & \sigma_{ij} = E_{ijkl} \varepsilon_{kl} \\ &\frac{\partial \sigma_{zx}}{\partial x} + \frac{\partial \sigma_{zz}}{\partial z} = 0 & +BC \end{split}$$

Oscillating singularity

$$\sigma \sim r^{-\frac{1}{2}} \sin(\varepsilon \log r), \quad V_f \to 0$$

$$\begin{split} \varepsilon &= \frac{1}{2\pi} \log \left(\frac{1-\beta}{1+\beta} \right) \\ \beta &= \frac{\mu_2 \left(\kappa_1 - 1 \right) - \mu_1 \left(\kappa_2 - 1 \right)}{\mu_2 \left(\kappa_1 + 1 \right) + \mu_1 \left(\kappa_2 + 1 \right)} \end{split}$$

- Finite Element Method (FEM) in AbaqusTM
- 2nd order shape functions
- 6-nodes triangles & 8-nodes quadrilaterals
- regular mesh of quadrilaterals at the crack tip:
 - AR ~ 1
 - $-\delta = 0.05^{\circ}$

 $\sigma_{VV} = \nu \left(\sigma_{XX} + \sigma_{ZZ} \right)$

nitiation of Transverse Cracks in FRPCs Modeling the Fiber-Matrix Interface Crack Debond Energy Release Rate Conclusions

nitiation of Transverse Cracks in FRPCs Modeling the Fiber-Matrix Interface Crack Debond Energy Release Rate Conclusion

Conclusions

- → Debond-debond interaction in the through-the-thickness direction is extremely localized: with only a couple of undamaged fibers in between, no effect can be seen!
- → For debonds on consecutive vertically-aligned fibers, G_I is higher and contact zone onset delayed if debonds are on the same side of their respective fiber.
- → No significant difference in G_{II} observed, except in the range $80^{\circ} 100^{\circ}$.
- → In the range $80^{\circ} 100^{\circ}$, G_{II} is higher when debonds are located on opposite sides of consecutive vertically-aligned fibers.
